The rating of the Issuer is A+ from Standard and Poor's.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aaa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category.

As defined by Standard & Poor's, an obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the relevant Issuer and Guarantor's capacity to meet its financial commitment on the obligation is still strong. The addition of a plus (+) or minus (-) sign shows relative standing within the rating category.

Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.

2. The BNP Paribas Group's risk management policies, procedures and methods may leave it exposed to unidentified or unanticipated risks, which could lead to material losses.

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.

4. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Certificates, including:

1. Risk relating to the structure of the Certificates:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of automatic early redemption features. Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until redemption. The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("**Stapled Shares**")), similar market risks to a direct equity investment, global depositary receipt ("**GDR**") or American depositary receipt ("**ADR**"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Certificates:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Quali sono i principali rischi specifici dei titoli?

Fattori di rischio più significativi specifici dei titoli

Vi sono rischi associati ai Certificates, fa cui:

1. Rischio relativo alla struttura dei Titoli:

Prodotti a scadenza predefinita: Gli investitori possono essere esposti a una perdita parziale o totale dell'investimento. Il rendimento dei Titoli dipende dalla performance del/i Sottostante/i di Riferimento e dall'applicazione delle clausole di Estinzione Anticipata Automatica. Inoltre, il rendimento può dipendere da altri fattori di mercato come i tassi di interesse, la volatilità implicita del/i Sottostante/i di Riferimento e il tempo residuo prima della scadenza. L'effetto della leva finanziaria sui Titoli può avere un effetto positivo o negativo.

2. Rischio relativo al Sottostante e sua Disgregazione e Rettifiche:

A differenza di un investimento diretto in una o più Azioni, le Azioni Stapled, GDR e/o ADR che comprendono il/i Riferimento/i Sottostante/i (insieme la/le "Azione/i"), un investimento in Titoli di Azioni non autorizza i Detentori a votare o ricevere dividendi o distribuzioni (salvo diversamente specificato nelle Condizioni Definitive). Di conseguenza, il rendimento dei Titoli Azionari non sarà lo stesso di un investimento diretto nella/e Azione/i pertinente/i e potrebbe essere inferiore a un investimento diretto: esposizione a una o più azioni (comprese le azioni collegate fra loro che vengono scambiate come una singola quota ("**Azioni Accoppiate**")), rischi di mercato simili a quelli di un investimento diretto in un'azione, certificati di deposito globale (global depositary receipt, "**GDR**") o certificati di deposito americani (American depositary receipt "**ADR**"), eventi di rettifica potenziali o eventi straordinari aventi un effetto sulle azioni e turbative di mercato o la mancata apertura di una Borsa, che potrebbero avere un effetto negativo sul valore e sulla liquidità dei Titoli e che l'Emittente non fornisce informazioni post-emissione in relazione al Sottostante di Riferimento.

3. Rischi relativi ai mercati di negoziazione dei Titoli:

Fattori che influenzano il valore e il prezzo di negoziazione dei Titoli: Il prezzo di negoziazione dei Titoli può essere influenzato da una serie di fattori tra cui, a titolo esemplificativo ma non esaustivo, il prezzo, il valore o il livello dei riferimenti sottostanti, il tempo rimanente fino alla data di rimborso programmata dei Titoli, l'effettiva o implicita volatilità associata ai riferimenti sottostanti e al rischio di correlazione dei riferimenti sottostanti pertinenti. La possibilità che il valore e il prezzo di negoziazione dei Titoli fluttuino (positivamente o negativamente) dipende da una serie di fattori, che gli investitori dovranno considerare attentamente prima di acquistare o vendere Titoli.

4. Rischi legali:

Assemblee: I termini dei Titoli conterranno disposizioni per la convocazione di assemblee dei portatori di tali Titoli per valutare questioni aventi un impatto sui loro interessi in generale. Tali disposizioni consentono a maggioranze definite di vincolare tutti i portatori, inclusi i portatori che non abbiano partecipato e votato all'assemblea del caso e i titolari che abbiano votato in maniera contraria alla maggioranza.
