3. INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE ISSUE/OFFER

Save for fees, if any, payable to the Dealer, and so far as the Issuer is aware, no person involved in the issue of the Certificates has an interest material to the offer.
The Dealer and its affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and its affiliates in the ordinary course of business.

Société Générale will ensure the roles of provider of hedging instruments to the Issuer of the Certificates and Calculation Agent of the Certificates. Société Générale will also ensure the roles of Collateral Agent and Securities Valuation Agent for the Certificates.
The possibility of conflicts of interest between the different roles of Société Générale on one hand, and between those of Société Générale in these roles and those of the Certificateholders on the other hand cannot be excluded.
Furthermore, given the banking activities of Société Générale, conflicts may arise between the interests of Société Générale acting in these capacities (including business relationship with the issuers of the financial instruments being underlyings of the Certificates or possession of non public information in relation with them) and those of the Certificateholders. Finally, the activities of Société Générale on the underlying financial instrument(s), on its proprietary account or on behalf of its customers, or the establishment of hedging transactions, may also have an impact on the price of these instruments and their liquidity, and thus may be in conflict with the interests of the Certificateholders.

The value of the Certificates is linked to the positive or negative performance of the underlying instrument. The amount(s) to be paid is/are determined on the basis of the condition which is satisfied (or not) if the performance of the underlying instrument is higher than or equal to a predefined barrier performance.

During the lifetime of the Certificates, the market value of these Certificates may be lower than the invested capital. Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital. Key risks that are specific to the guarantor :

Due to Société Générale's role as guarantor and counterparty to the Issuer's hedging transactions, investors are essentially exposed to Société Générale's credit risk and have no recourse against the Issuer in the event of the Issuer's default.

WHAT ARE THE KEY RISKS THAT ARE SPECIFIC TO THE SECURITIES?

The investor bears the risk of total or partial loss of the amount invested at redemption of the Certificates on the Final Exercise Date or the event the Certificates is sold by the investor before that date.

Although it is subject to market making agreement, the liquidity of the product may be affected by exceptional circumstances that make it difficult to sell the product or at a price that results in a total or partial loss of the amount invested.

The market value of the Certificates depends on the evolution of market parameters at the time of exit (price level of the Underlying(s), interest rates, volatility and credit spreads) and may therefore result in a risk of total or partial loss on the amount initially invested.

Events unrelated to the Underlying(s) (e.g. change in law, including tax law, force majeure, number of securities in circulation) may lead to early redemption of the Certificates and thus to total or partial loss of the amount invested.

Events affecting the Underlying(s) or hedging transactions may lead to adjustments, de-indexation, substitution of the Underlying(s), or early redemption of the Certificates and consequently to losses on the amount invested, including in the case of capital protection.

If the currency of the investor's main activities is different from that of the product, the investor is exposed to currency risk, especially in the event of exchange controls, which may reduce the amount invested.

The investor is exposed to the risk that the proceeds from the liquidation of the collateral assets will not be sufficient to cover the amount due under the Certificates which is equal to their market value (without taking into account the default of the issuer or guarantor). Such shortfall may be due to lack of diversification or liquidity of the collateral assets, miscalibration, change or absence of haircuts applicable to the valuation of the collateral assets, correlation between the value of the collateral assets and the creditworthiness of the issuer or guarantor, collateralisation at par value or subordination to payment of certain providers.

The performance of foreign exchange rate(s) is dependent on the supply and demand for the relevant currencies, which are subject to economic and political factors. Such factors could have a negative impact on the performance of the foreign exchange rate(s) and consequently on the value of the Certificates. Foreign exchange rate(s) risks can be expected to intensify in periods of financial turmoil.

Rischi chiave specifici del garante

Considerando che Société Générale è garante e controparte delle operazioni di copertura dell'Emittente, gli investitori sono essenzialmente esposti al rischio di credito di Société Générale e non hanno ricorso nei confronti dell'Emittente in caso di inadempimento dell'Emittente.

QUALI SONO I RISCHI CHIAVE SPECIFICI DEI TITOLI?

L'investitore assume il rischio di perdita totale o parziale dell'importo investito in occasione del rimborso dei Certificati alla relativa data di scadenza oppure nel caso in cui l'investitore venda i Certificati prima di tale data.

Benché sia oggetto di impegni di market making, la liquidità del prodotto può essere influenzata dal verificarsi di circostanze eccezionali che potrebbero rendere difficile vendere il prodotto o comunque ad un prezzo che produce la perdita totale o parziale dell'importo investito.

Il valore di mercato dei Certificati dipende dall'evoluzione dei parametri di mercato al momento dell'uscita (livello dei prezzi dei Sottostanti, tassi di interesse, volatilità e credit spreads) e può pertanto comportare un rischio di perdita totale o parziale dell'importo inizialmente investito.

Il verificarsi di eventi non legati al Sottostante (quali la modifica di previsioni di legge, inclusa la normativa fiscale, eventi di forza maggiore) possono determinare il rimborso anticipato dei Certificati e quindi la perdita totale o parziale dell'importo investito.

Il verificarsi di eventi relativi al Sottostante ovvero a operazioni di copertura può determinare la necessità di rettifiche, de-indicizzazioni, sostituzione del Sottostante,e di conseguenza a perdite del capitale investito, anche in caso di prodotti a capitale protetto.

Se la valuta di riferimento delle attività principali dell'investitore è diversa da quella del prodotto, l'investitore è esposto al rischio di cambio, in particolare in caso di controlli sul cambio, che potrebbero ridurre l'importo investito.

L'investitore è esposto al rischio che i proventi derivanti dalla liquidazione degli attivi posti a garanzia non siano sufficienti a coprire l'importo dovuto in relazione ai Certificati, importo pari al loro valore di mercato (senza tener conto dell'eventuale default dell'emittente o del garante). Tale insufficienza può derivare da una mancanza di diversificazione o liquidità degli attivi posti a garanzia, da errori di calibrazione, da modifiche o assenza degli haircut applicabili alla valutazione degli attivi a garanzia, dalla correlazione tra il valore degli attivi a garanzia e la solidità creditizia dell'emittente o del garante, dalla collateralizzazione al valore nominale o dalla subordinazione rispetto al pagamento di determinati fornitori.
