What are the key risks that are specific to the Issuer?

Risk exposure to debt securities issued by sovereign States

The market tensions regarding government bonds and their volatility, as well as Italy's rating downgrading or the forecast that such downgrading may occur, might have negative effects on the assets, the economic and/or financial situation, the operational results and the perspectives of the Bank. Intesa Sanpaolo Group results are and will be exposed to sovereign debtors, in particular to the Republic of Italy and certain major European Countries.

Risks related to legal proceedings

The breakdown according to the main categories of disputes with likely risk shows the prevalence of cases related to the Group's ordinary banking and credit activities, involving claims relating to banking and investment products and services or on credit positions and clawback actions. The remaining disputes mainly consist of other civil and administrative proceedings and labour disputes or criminal proceedings or proceedings related to operational violations.

Risks related to the economic/financial crisis and the impact of current uncertainties of the macro-economic context

The future development in the macro-economic context may be considered as a risk as it may produce negative effects and trends in the economic and financial situation of the Bank and/or the Group. Any negative variations of the factors that affect the macro-economic framework, in particular during periods of economic-financial crisis, could lead the Bank and/or the Group to suffer losses, increases of financing costs, and reductions of the value of the assets held, with a potential negative impact on the liquidity of the Bank and/or the Group and its financial soundness.

Credit risk

The economic and financial activity and soundness of the Bank depend on its borrower's creditworthiness. The Bank is exposed to the traditional risks related to credit activity. Therefore, the clients' breach of the agreements entered into and of their underlying obligations, or any lack of information or incorrect information provided by them as to their respective financial and credit position, could have negative effects on the economic and/or financial situation of the Bank.

Market risk

The market risk is the risk of losses in the value of financial instruments, including the securities of sovereign States held by the Bank, due to the movements of market variables (by way of example and without limitation, interest rates, prices of securities, exchange rates), which could determine a deterioration of the financial soundness of the Bank and/or the Group. Such deterioration could be produced either by negative effects on the income statement deriving from positions held for trading purposes, or from negative changes in the FVOCI (Fair Value through Other Comprehensive Income) reserve, generated by positions classified as financial activities evaluated at fair value, with an impact on the overall profitability.

Liquidity risk of Intesa Sanpaolo

Although the Bank constantly monitors its own liquidity risk, any negative development of the market situation and the general economic context and/or creditworthiness of the Bank, may have negative effects on the activities and the economic and/or financial situation of the Bank and the Intesa Sanpaolo Group. In particular, the Issuer remains attentive to the evolution of the funding market to ensure that its ordinary refinancing strategies and normal business are not affected by cumulative effect of the maturity of all the wholesale funding and the additional outflows due to the impact of adverse market liquidity scenarios. The liquidity risk is the risk that the Bank is not able to satisfy its payment obligations at maturity, both due to the inability to raise funds on the market (funding liquidity risk) and of the difficulty to disinvest its own assets (market liquidity risk).

Operational risk

The Bank is exposed to several categories of operational risk which are intrinsic to its business, among which are those mentioned herein, by way of example and without limitation: frauds by external persons, frauds or losses arising from the unfaithfulness of the employees and/or breach of control procedures, operational errors, defects or malfunctions of computer or telecommunication systems, computer virus attacks, default of

suppliers with respect to their contractual obligations, terrorist attacks and natural disasters. The occurrence of one or more of said risks may have significant negative effects on the business, the operational results and the economic and financial situation of the Bank.

Risk related to the development of the banking sector regulation and the changes in the regulation on the solution of banking crises

The Bank is subject to a complex and strict regulation, as well as to the supervisory activity performed by the relevant institutions (in particular, the ECB, the Bank of Italy and CONSOB). Both the aforementioned regulation and supervisory activity are subject, respectively, to continuous updates and practice developments. Furthermore, as a listed Bank, the Bank is required to comply with further provisions issued by CONSOB. The Bank, besides the supranational and national rules and the primary or regulatory rules of the financial and banking sector, is also subject to specific rules on anti-money laundering, usury and consumer protection. Although the Bank undertakes to comply with the set of rules and regulations, any changes of the rules and/or changes of the interpretation and/or implementation of the same by the competent authorities could give rise to new burdens and obligations for the Bank, with possible negative impacts on the operational results and the economic and financial situation of the Bank.

Section 3 – Key information on the Securities

Type, class and ISIN

The Securities are Certificates. The Securities are issued in italian dematerialised form ("**Italian Dematerialised Securities**").

The Certificates are cash settled.

The ISIN of the Certificates is IT0005730079.

Currency, denomination, and term of the Securities

The issue price of the Certificates is equal to EUR 1,000 (the "**Issue Price**").

The Securities are issued in EUR (the "**Issue Currency**").

The Settlement Currency is EUR.

Each Certificate shall be automatically exercised on the Settlement Date. The Settlement Date is 8 September 2031. Otherwise, they may be redeemed before the Settlement Date upon the occurrence of an Early Redemption Event.

Rights attached to the Securities

The Certificates and any non-contractual obligations arising out of or in connection with the Certificates will be governed by, and shall be construed in accordance with, English Law. The registration and transfer of the Securities in Monte Titoli S.p.A. shall be governed by, and shall be construed in accordance with, Italian law.

The Certificates entitle its holder to receive from the Issuer the following amounts.

REMUNERATION AMOUNT

The Certificates provide for the following remuneration amount.

DIGITAL AMOUNTS

The Certificates provide for the payment of the Digital Amount upon occurrence of the relevant Digital Event. A Digital Event will occur if the Reference Value on the relevant Digital Valuation Period, is higher than or equal to the Digital Level.

The Digital Valuation Periods are: 1 September 2027 (the "**First Digital Valuation Period**"); 1 September 2028 (the "**Second Digital Valuation Period**"); 3 September 2029 (the "**Third Digital Valuation Period**"); 3 September 2030 (the "**Fourth Digital Valuation Period**"); 4 September 2031 (the "**Fifth Digital Valuation Period**").

The Digital Level is equal to 60% of the Initial Reference Value (the "**Digital Level**"), in relation to each Digital Valuation Period.

The Digital Amount is equal to EUR 70.00 in relation to each Digital Valuation Period.

In relation to the Digital Amounts, the following effect applies:

Memory Effect

If the Reference Value on the following periods: 1 September 2028 (the "**First Memory Valuation Period**"); 3 September 2029 (the "**Second Memory Valuation Period**"); 3 September 2030 (the "**Third Memory Valuation Period**"); 4 September 2031 (the "**Fourth Memory Valuation Period**") is higher than or equal to 60% of the Initial Reference Value (the "**Memory Level**") in relation to each Memory Valuation Period, the Securityholders will receive the Digital Amount(s) which were not due because of the non-occurrence of the relevant Digital Event or the non-occurrence of the Memory Effect in a previous Memory Valuation Period.

****

EARLY REDEMPTION AMOUNTS

The Certificates provide the possibility of an automatic early redemption if an Early Redemption Event has occurred. In particular, if the Reference Value on the following periods: 1 September 2027 (the "**First Early Redemption Valuation Period**"); 1 September 2028 (the "**Second Early Redemption Valuation Period**"); 3 September 2029 (the "**Third Early Redemption Valuation Period**"); 3 September 2030 (the "**Fourth Early Redemption Valuation Period**") is higher than or equal to the Early Redemption Level, the Certificates will be automatically redeemed and the Securityholder will receive the payment of the amount, equal to:

EUR 1,000.00 in relation to each Early Redemption Valuation Period (the "**Early Redemption Amount**").

The Early Redemption Level is equal to 100% of the Initial Reference Value (the "**Early Redemption Level**") in relation to each Early Redemption Valuation Period.

****

CASH SETTLEMENT AMOUNT

The Securityholder will receive on the Settlement Date, if an Early Redemption Event has not occurred, for each Minimum Exercise Amount, the payment of the Cash Settlement Amount (if positive) determined as follows.

STANDARD LONG CERTIFICATES

CALCULATION METHOD IN THE CASE OF POSITIVE AND NEGATIVE PERFORMANCE OF THE UNDERLYING (BARRIER EVENT NOT OCCURRED)

The investor will receive an amount linked to a percentage of the Initial Reference Value, equal to 100% (the "**Initial Percentage**").

CALCULATION METHOD IN THE CASE OF NEGATIVE PERFORMANCE OF THE UNDERLYING (BARRIER EVENT OCCURRED)

The Barrier Event will occur if on the Valuation Date, the Final Reference Value is lower than the Barrier Level equal to 50% of the Initial Reference Value.
If a Barrier Event has occurred, the Cash Settlement Amount will be linked to the performance of the Underlying (i.e. the investment in the Certificate is a direct investment in the Underlying) and therefore will be exposed to the partial or total loss of the capital invested.

****

For the purposes of the above the following applies:

For the purposes of the determination of the Barrier Event, the Reference Value will be the Final Reference Value.

For the purposes of the determination of the Digital Event, the Early Redemption Event and the Memory Effect, the Reference Value will be registered, respectively, on the relevant Digital Valuation Period, on the relevant Early Redemption Valuation Period and on the relevant Memory Valuation Period and it is equal to the closing level of the Underlying on such dates.

The Initial Reference Value will be registered on 7 September 2026 (the "**Determination Date**") and it is equal to the closing level of the Underlying on such date.

The Final Reference Value will be registered on 4 September 2031 (the "**Valuation Date**") and it is equal to the closing level of the Underlying on such date.

The Underlying is the EURO STOXX® Banks Index (ISIN Code: EU0009658426, Bloomberg Code: SX7E Index) (the "**Underlying**" or the "**Index**").

The Underlying is provided by STOXX Limited. As at the date of this document, STOXX Limited appears in the register of administrators and benchmarks established and maintained by ESMA pursuant to Article 36 of the Benchmark Regulation.

In respect of the Underlying, certain historical information (including past performance thereof) may be found on major information providers, such as Bloomberg and Reuters. Information about the Index may be found on the website of the Index Sponsor www.stoxx.com.

Seniority of the Securities

The Certificates constitute direct, unsubordinated, unconditional and unsecured obligations of the Issuer and, unless provided otherwise by law, rank *pari passu* among themselves and (save for certain obligations required to be preferred by law) rank equally with all other unsecured obligations (other than subordinated obligations, if any) of the Issuer from time to time outstanding.

Restrictions on the free transferability

The Securities will be freely transferable, subject to the offering and selling restrictions in the United States, the European Economic Area under the Prospectus Regulation and the laws of any jurisdiction in which the relevant Securities are offered or sold.

Where will the Securities be traded?

Application has been made for the Securities to be admitted to trading on the regulated market of the Luxembourg Stock Exchange with effect from the Issue Date or a date around the Issue Date.

Application has also been made for the Securities to be admitted to trading on the Italian multilateral trading facility EuroTLX, organised and managed by Borsa Italiana S.p.A., which is not a regulated market for the purposes of Directive 2014/65/EU as amended, with effect from the Issue Date or a date around the Issue Date.

After the Issue Date, application may be made to list the Securities on other stock exchanges or regulated markets or to admit to trading on other trading venues as the Issuer may decide.

What are the key risks that are specific to the Securities?

The Certificates may not be a suitable investment for all investors

Certificates are complex financial instruments. A potential investor should not invest in Certificates which are complex financial instruments unless it has the expertise (either alone or with the help of a financial adviser) to evaluate how the Certificates will perform under changing conditions, the resulting effects on the value of the Certificates and the impact this investment will have on the potential investor's overall investment portfolio.

General risks and risks relating to the Underlying

The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Purchasers should be prepared to sustain a partial or total loss of the purchase price of their Securities. Fluctuations in the value of the relevant Underlying will affect the value of the Securities. Purchasers of Securities risk losing their entire investment or part of it if the value of the relevant underlying basis of reference does not move in the anticipated direction.

Risk arising from the Benchmark Regulation

The Underlying may qualify as a benchmark (the "**Benchmark**") within the meaning of Regulation (EU) 2016/1011 of the European Parliament and of the Council dated 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmark Regulation**"). On May 2025, Regulation (EU) 2025/914 of 7 May 2025 amending the Benchmark Regulation was published in the Official Journal of the European and started applying from 1 January 2026. According to the new provisions, the Benchmark Regulation applies only to benchmarks that are classified as "critical" or "significant", to EU Paris-aligned Benchmarks, EU Climate Transition Benchmarks and to certain commodity benchmarks. Other benchmarks, including those that are categorized as "non-significant" benchmarks under the Benchmark Regulation, are no longer in scope of the Benchmark Regulation. Any changes to a Benchmark as a result of the Benchmark Regulation could have a material adverse effect on the costs of refinancing a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with the Benchmark Regulation. Such factors may have the following effects on certain Benchmarks: (i) discourage market participants from continuing to administer or contribute to such Benchmark; (ii) trigger changes in the rules or methodologies used in the Benchmarks; or (iii) lead to the disappearance of the Benchmark. Any of the above changes or any other consequential changes as a result of international, national or other proposal for reform or other initiatives or investigations, could have a material adverse effect on the value of and the amount payable under the Securities. The potential elimination of a Benchmark, or changes in the manner of administration of such Benchmark, as a result of the Benchmark Regulation or otherwise, could require an adjustment to the terms and conditions, or result in other consequences. These reforms and changes may cause a Benchmark to perform differently than it has done in the past or be discontinued. The application of the fallback methods may expose investors to certain risks including, but not limited to (i) conflicts of interest of the Calculation Agent when making the required adjustments to the Securities, or (ii) the replacement of the Underlying with a different Underlying which could perform differently than the original Underlying and therefore affect amounts payable in respect of the Securities, or (iii) the early redemption of the Securities. Investors should be aware that they face the risk that any changes to the relevant Benchmark may have a material adverse effect on the value of and the amount payable under the Securities.

Loss risk in relation to the investment

The Securityholders shall consider that, in relation to its investment, there is a risk of loss of the capital invested depending on the features of the Securities and on the performance of the Underlying. In particular, in the event a Barrier Event has occurred, a loss will occur in respect of the capital invested. If the Final Reference Value is equal to zero, the investor will suffer a total loss of the capital. Moreover, if prior to the exercise the investor decides to terminate the investment in the Certificates, the investor might be subject to the loss of the value of the Certificate and, therefore, might be subject to the total or partial loss of the investment. An early termination of the Securities following the occurrence of a Market Disruption Event or an Adjustment Event under Condition 15 (Market Disruption Events and Adjustment Events) will entitle Securityholders to receive an amount not lower than the fair market value of the Securities. If such amount is lower than the purchase price paid by the Securityholder, the Securityholder will incur a partial loss of the initial investment.

Risk related to the Digital Level

In relation to the Certificates, the Issuer has set, at its own discretion, the Digital Level. The higher the Digital Level is set in respect of the Initial Reference Value, the greater the possibility that the Digital Event will not occur and therefore that the Digital Amount will not be paid.

Risk related to the occurrence of an Early Redemption Event

If an Early Redemption Event occurs, the Certificates will be redeemed earlier than the Settlement Date (and therefore terminated). In such case, the Securityholders will receive the Early Redemption Amount on the relevant Early Payment Date and no other amounts will be paid. The Early Redemption Amount is an amount predetermined by the Issuer which will not depend on the value of the underlying asset and, therefore, the potential positive performance of such underlying asset will not be considered. In addition, in the event that the underlying asset is registering a positive performance when an Early Redemption Event occurs, investors should consider that it may not be possible to reinvest in such underlying asset at the same conditions applied to the initial investment made in the Certificates.

Possible illiquidity of the Securities in the secondary market

It is not possible to predict the price at which Securities will trade in the secondary market or whether such market will be liquid or illiquid. The Issuer, or any of its Affiliates may, but is not obliged to, at any time purchase Securities at any price in the open market or by tender or private treaty. Any Securities so purchased may be held or resold or surrendered for cancellation. The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. Even if the Issuer or such other entity is a market-maker for an issue of Securities, the secondary market for such Securities may be limited. To the extent that an issue of Securities becomes illiquid, an investor may have to wait until the Settlement Date to realise value.

Section 4 – Key information on the offer of Securities to the public

Under which conditions and timetable can I invest in this Security?

Not applicable - the Securities are not being offered to the public as part of a public offer.

Who is the offeror?
