Application will be made for the Securities to be admitted to trading on the Multilateral Trading Facility of securitised derivatives financial instruments organised and managed by Borsa Italiana S.p.A. (the "**SeDeX MTF**").

2. Ratings

The Securities have not been rated.

The rating of the Issuer is A+ from Standard and Poor's.

The rating of the Guarantor is A1 from Moody's and A+ from Standard and Poor's.

As defined by Moody's, an "A" rating means that the obligations of the Issuer and the Guarantor under the Programme are judged to be upper-medium grade and are subject to low credit risk. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aaa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category.

As defined by Standard & Poor's, an obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the relevant Issuer and Guarantor's capacity to meet its financial commitment on the obligation is still strong. The addition of a plus (+) or minus (-) sign shows relative standing within the rating category.

Standard & Poor's is established in the European Union and is registered under Regulation (EC) No. 1060/2009 (as amended) (the "**CRA Regulation**"). Moody's is not established in the European Union and has not applied for registration under the CRA Regulation. Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.

2. The BNP Paribas Group's risk management policies, procedures and methods may leave it exposed to unidentified or unanticipated risks, which could lead to material losses.

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.

4. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.

5. Adverse economic and financial conditions have in the past and may in the future significantly affect the BNP Paribas Group and the markets in which it operates.

6. Laws and regulations in force, as well as current and future legislative and regulatory developments, may significantly impact the BNP Paribas Group and the financial and economic environment in which it operates.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Certificates, including:

1. Risk relating to the structure of the Certificates:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of automatic early redemption features. Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until redemption. The effect of leverage on the Securities may be either positive or negative. Open End Certificates and OET Certificates do not have any pre-determined maturity and may be redeemed on any date determined by the relevant Issuer and investment in such Open End Certificates and OET Certificates entails additional risks compared with other Certificates due to the fact that the redemption date cannot be determined by the investor.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Certificates:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Quali sono i principali rischi specifici dei titoli?

Fattori di rischio più significativi specifici dei titoli

Vi sono rischi associati ai Certificates, fa cui:

1. Rischio relativo alla struttura dei Titoli:

Prodotti a scadenza predefinita: Gli investitori possono essere esposti a una perdita parziale o totale dell'investimento. Il rendimento dei Titoli dipende dalla performance del/i Sottostante/i di Riferimento e dall'applicazione delle clausole di Estinzione Anticipata Automatica. Inoltre, il rendimento può dipendere da altri fattori di mercato come i tassi di interesse, la volatilità implicita del/i Sottostante/i di Riferimento e il tempo residuo prima della scadenza. L'effetto della leva finanziaria sui Titoli può avere un effetto positivo o negativo. Gli Open End Certificates e gli OET Certificates non contemplano una scadenza prestabilita e possono essere rimborsati in qualsiasi data determinata dall'Emittente di riferimento, a sua esclusiva e totale discrezione, e gli investimenti in tali Open End Certificates e OET Certificates comportano rischi aggiuntivi rispetto ad altri Certificates a causa dell'impossibilità da parte dell'investitore di stabilire la data di rimborso.

2. Rischio relativo al Sottostante e sua Disgregazione e Rettifiche:

I Titoli Indicizzati sono collegati alla performance di un indice sottostante (un "indice"), che può fare riferimento a varie classi di asset quali, azioni, obbligazioni, tassi di cambio o dati sui prezzi degli immobili, oppure potrebbe fare riferimento a una combinazione di classi di attività. Gli investitori in Titoli Indicizzati affrontano il rischio di una serie più ampia di circostanze, questo significa che le attività sottostanti l'Indice non funzionano come previsto rispetto a un investimento in titoli di debito convenzionali. Di conseguenza, è più probabile che il rendimento di un investimento in titoli indicizzati sia influenzato negativamente rispetto a un investimento in titoli di debito convenzionali: nel caso di Titoli Indicizzati, l'esposizione a uno esposizione a uno o più indici, eventi di rettifica e turbative di mercato o la mancata apertura di una borsa, che potrebbero avere un effetto negativo sul valore e sulla liquidità dei Titoli.

3. Rischi relativi ai mercati di negoziazione dei Titoli:

Fattori che influenzano il valore e il prezzo di negoziazione dei Titoli: Il prezzo di negoziazione dei Titoli può essere influenzato da una serie di fattori tra cui, a titolo esemplificativo ma non esaustivo, il prezzo, il valore o il livello dei riferimenti sottostanti, il tempo rimanente fino alla data di rimborso programmata dei Titoli, l'effettiva o implicita volatilità associata ai riferimenti sottostanti e al rischio di correlazione dei riferimenti sottostanti pertinenti. La possibilità che il valore e il prezzo di negoziazione dei Titoli fluttuino (positivamente o negativamente) dipende da una serie di fattori, che gli investitori dovranno considerare attentamente prima di acquistare o vendere Titoli.

4. Rischi legali:

Assemblee: I termini dei Titoli conterranno disposizioni per la convocazione di assemblee dei portatori di tali Titoli per valutare questioni aventi un impatto sui loro interessi in generale. Tali disposizioni consentono a maggioranze definite di vincolare tutti i portatori, inclusi i portatori che non abbiano partecipato e votato all'assemblea del caso e i titolari che abbiano votato in maniera contraria alla maggioranza.
